COMMENTS:

Per a review of the wellbores, it was determined by SandRidge that the planned completed portion of the lateral between the referenced well and the Hebron 2-07H is greater than 800 feet and that the fracture orientation will be in an east/west direction and not north/south. SandRidge believes there is zero chance of communication between the two (2) wellbores as the perf intervals will be greater than 600 feet. SandRidge respectfully requests the mitigation measures agreed to by EE3 be removed from this permit.
