#### Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During routine operations, an overflow of less than 5 barrels from the produced water sump was discovered inside the containment at the Callen-USX N 65N67W/27NWNW production facility. Excavation activities are on-going and are being guided in the field by screening soils for volatile organic compound (VOC) concentrations using a photoionization detector (PID). Approximately 260 cubic yards of impacted material have been excavated and transported to the Buffalo Ridge Landfill in Keenesburg, Colorado and North Weld Landfill in Ault, Colorado for disposal. Confirmation soil samples will be collected from the final extent of the excavation area. Site investigation and excavation activities will be summarized in a subsequent Supplemental Form 19.
