Agency	kertr	This well and it's related production facilities will fall within a semi-populated area, the well head and it's related production facilities will fenced. All facilities will be gated and locked to prevent unlawful entrance.	02/07/2010
Agency	youngr	Location is in a sensitive area because of close proximity to surface water, therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at well site during drilling and completion operations.	01/28/2010

<span style="color: red;">This is an abandoned location inspection for well API 001-09726. It does not appear that the well API: 001-09726 (AL) was drilled on the location with producing wells 001-09584 and 001-09094. Therefore, this is a well release on an active location.</span>	binschusc	02/01/2016
