General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Agency	No ongoing remediation or monitoring is required at this time. However the REM # cannot be closed until all impacted material has either been removed or treated to Table 910-1 compliance standards. Per OXY's amended F-27: At the end of the life of the facility, or if upgrades to the pipeline infrastructure allow for additional excavation and remediation, Oxy will remediate any exposed impacted soil to ensure compliance with COGCC Table 910-1 standards. Soils will be stockpiled on the location footprint for characterization to determine feasible disposal or treatment options. Following excavation of impacted soil, Oxy will ensure compliance with COGCC Table 910-1 standards for the excavation footprint. If onsite treatment and stabilization is feasible, Oxy will treat and stabilize the impacted soils in batches and dispose into the open excavation. If offsite disposal is determined as the available option, Oxy will dispose of the impacted soil at a commercial offsite disposal facility.	2/1/2016 2:05:22 PM
