Wildlife BMPs:

BMP Type	Comment
PROPOSED BMPs	<p>Idler B #2X</p> <p>NW NE Section 32, T22S, R47W</p> <p>Prowers County, Colorado</p> <p>Stormwater Management & roposed BMP's</p> <p>Renegade Oil & Gas Company, LLC (Renegade) has in place Stormwater Management Plans for both construction and post - construction activities that ensure compliance with both the Colorado Department of Public Health and Environment (CDPHE) and Colorado Oil & Gas Conservation Commission (COGCC) requirements.</p> <p>The plans provide for various sediment control BMP's that are applied on a site specific basis. These BMP's include fiber rolls, silt fences, straw bales, berms, dams, ditches, culverts, mulching, revegetation, etc. Not all BMP's will be used at each</p> <p>construction site. Renegade, and its consultants, attempt to use BMP's that minimize surface disturbance and adverse environmental impacts.</p> <p>The site for the Idler B #2X well is a flat, tilled, implanted farm field that already has a primary berm in place in the form of elevated farm roads on the south and east side of location. Renegade will construct a drill site by moving the topsoil to the exterior of the drill site and using the soil to berm the entire site. This will provide containment for the entire site, and facilitate interim reclamation by simply returning the topsoil to the drill site.</p>
