Kris,

Based on the following information, I don't believe that there was in fact a pit on JC Donnell 3:

Google Earth historic imagery 1993-2014 shows no visible pit on location, see attachment.

I could not find a site security diagram in our files that shows a pit on location. I've attached the oldest drawing that we have in our files.

COGCC database turned up one sundry for a pit linked to the location, but all the information is for JC Donnell 8, see attachment.

Speaking to Ray Hollander, Chief Operator in the Powder wash field with 20+ years, he also has no recollection of there ever being a pit on that location.

I'm requesting that Facility ID #116574 be closed, as I believe it was created in error.

Let me know if there is any other information I can provide.

Thank you!

April Stegall

Gentlemen:

In accordance with the Onshore Order No. 3, Site Security Regulations, submitted herewith is a site facilities diagram for the above captioned facility.

This site facility diagram is part of the Powder Wash Unit Plan. The Site Security Plan may be reviewed at the Wexpro Company, Powder Wash Plant office, Monday through Friday, 8:00 a.m. to 4:00 p.m.

If you require further information, please contact me.

Sincerely,

Tammy Fredrickson
Office Administrator II
