Sidetrack verbal approval granted via E-Mail by Diana Burn Monday, February 29, 2016, 3:46 PM.
While drilling in the curve we encountered a fault and the build rates dropped off and we are unable to get the build rates needed to land in the Codell. With the current build rates we would end up landing 15'-20' low of our target zone. The intent is to sidetrack off a cement plug at 5,121' and finish drilling the well to its original BHL. I have attached the schematic for the sidetrack request below.
