Subject: Spill Notification - Gee 15C-25HZ

Good Evening Everyone,

We had a State Reportable Release at the location listed below. During work over operations at the location, a release occurred resulting in a mist of oil from the wellhead. The cause of the release is still being investigated. The oil misted two isolated gravel quarry ponds, and a wetland fringe area along a dry drainage. Clean up activities are currently in progress. We do not have an estimate on total release volume as of yet. Notifications have been made to the National Response Center and Colorado Department of Public Health and Environment. More information will be provided in a forthcoming Form 19 Initial Release Report. Thank you,

Gee 15C-25HZ
