Paul and Phil,
attached is the approved form 27 for the site investigation and remediation plans with respect to the Helgoth Heirs Unit 1 location. The record of the spill has been moved to closed in the COGCC database based on the plans stated in the approved Project 9549.

Hi Peter,

I've attached part 1 of 2, of the Form 27 for the subject site, which was originally submitted to COGCC 7/31/14. Part 2 of 2 will follow in a separate email. Let me know if you have questions.

Paul

You could mail or if you want split the file into 2 parts and send separately by email. I can piece back together for our image system.

Thanks

Peter

Hi Peter,

We submitted the Form 27 for this site on 7/31/14. We have not received any kind of approval for it.

Per your suggestion, I used Adobe Acrobat to re-size the file for email, but it's still 32 MB – too big to email. Would you like me to put it on CD and mail it to you?

...and thanks for the Adobe Acrobat re-sizing tip. Didn't know that was possible.

Paul

Paul, I cannot find any approved or in process form 27 associated with this well or the location but did put

the annual 2014 summary into the spill file and noted the presence of free product at the site.

If you have an approved 27 please let me know the number. I do not have any submission from before I started in late July of last year as those submissions were left in the hands of whomever you sent to. If you do not have a project number then please send or resend the form 27 to me so I can review and get in the system.

Thanks

Peter
