## COMMENTS:

REM# 9280 status update: Pit remediation on the Federal 8-6 reserve pit began in the fall of 2015. Winter moved in before the work could be completed. With the late fall and early winter moisture the sites turned into mud and then froze. The Federal 8-6 may require further remediation of the stockpiled soil from the pit to meet requirements. Its pit contents are stockpiled and the pit is open. Whiting anticipates starting up again in April 2016 after the spring thaw and dry out. Work before then would not be practical as the ground in the area is currently frozen and when it first thaws the sites get very muddy. Work to date was completed in accordance with the approved course of action and discussions with the jurisdictional agencies.

## H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.
