Permitting Department  
Colorado Oil and Gas Conservation Commission  
1120 Lincoln Street, Suite 801  
Denver, CO 80203

Permitting Department:

The U.S. Department of Energy Office of Legacy Management (DOE-LM) has performed a preliminary review of the new wells proposed by Caerus Oil and Gas LLC and the well location information provided by the Colorado Oil and Gas Conservation Commission (COGCC). The COGCC table below indicates the planned surface hole and bottom hole locations for gas wells to be drilled near the Rulison, Colorado, Site.

API		APDS in Processing				Bottom	Hole Location	PreScreen DOE Notice	DOE Notice	DOE Notice

**Abbreviations:**

APDS = applications for permit to drill

API = American Petroleum Institute. The API well numbers are assigned by the appropriate state or federal regulatory agency.

SHL = surface hole location

DOE-LM reviewed the proposed location information and determined that six wells are located in Tier I Section 8, eight wells are in Tier II Section 8, and six wells are in Tier II Section 9 of the COGCC sampling areas.

All surface drill pad locations are within NENW Sec 35 7S 95W, with bottom hole locations within Section 35. The proposed Battlement Mesa well location, BM 41A--35-795 (API #05-045), would be the closest to the Rulison, Colorado, site; that bottom hole location is approximately 0.62 mile south of the site.

At this time, DOE-LM is not requesting any additional information but requests that COGCC place general language in the permit requiring that the company accommodate DOE-LM sampling requests in the future. DOE-LM will continue to review the proposed locations and subsurface orientations of the proposed drilling to look for any potential problems involving future DOE-LM sampling at the Rulison site.

Please contact me at (970) 248-6034 if you have any questions. Please send any correspondence to:
