As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

The morning of 8/6/2015, a flowline leak was discovered by a Foundation Energy Management (the operator) pumper making his rounds. The estimated total produced water spilled is between 5-8 bbls. The spill is located between the Hilltop #32-5 and the Hilltop #31-5, and settled right on the dirt road between the two wells (nearer to the #32-5). Upon discovery, the wells connected to the flowline were shut in, and a roustabout crew was called to come out and fix the leak.
