Title: Field Regulatory Manager Email: kyle.waggoner@whiting.com Date: 3/30/2016

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Trujillo, Aaron Date: 4/11/2016

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

	Approval/passing of the form 4 acknowledges that the Oil and Gas Conservation Commission has received the Notice. It is not an acknowledgement that the reclamation has been passed. A field inspection will be conducted at a future date to evaluate compliance with reclamation standards.
	Enough topsoil will be saved and stockpiled to cover final reclamation of the location.
	Mechanical treatment will be used for weed management until desirable perennial vegetation has become established. At that point weed management through the use of chemical treatments may be incorporated.
	Unless operator has (and can provide) evidence of reclamation success through the use of Cornstalk as a mulch type, straw mulch shall be used.

General Comments**User Group****Comment****Comment Date**

Reclamation Specialist	A soil analysis will be provided the best information on whether or not fertilizer and soil amendments will be needed. Be cautious and avoid applying too much nitrogen/phosphorus. Advise the use of composted manure over raw manure.	4/11/2016 10:11:47 AM
Reclamation Specialist	Advise against incorporating Sterile Triticale from seed mixture as it is an annual grass that will compete with, and not contribute to, the establishment of desirable perennial vegetation.	4/11/2016 10:04:28 AM
Routing Review	A task has been opened for C. Binschus (Reclamation Group) to review the document.	3/31/2016 7:52:14 AM
