Engineer	Offset wells target the Mesaverde. No mitigation required. Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is a 3001 foot deep monitoring well for industrial purposes. Geologic prognosis shows the proposed surface casing covers the entire Green River formation.	3/30/2016 3:00:46 PM
