Dave,

Catamount filed a Form 2A for the following tank battery which was approved on February 2, 2014. Apparently, this facility was never constructed; however, Maralex has a series of four (4) 300 bbl tanks at the same location of the proposed Catamount Facility. I was on location last week where there was an ongoing release from the northeastern most tank. I contacted Craig Reid and he informed me that this battery is not Catamounts. I then contacted Maralex (Kerry) to inform them on the ongoing release.

Should Catamount file a Form 4 to abandon the location of their 2A?
