Environmental	This spill was originally approved as closed in June 2014 via the attached Form 4. This report confirms closure. Based on review of information presented, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.	5/4/2016 10:52:16 AM
