Re: COGCC Application for Permit to Inject - Federal 5-35 (API #05-081-06818)  
Section 35, 9 North, 91 West, Moffat County, Colorado

Ladies and Gentlemen:

Mustang Resources LLC ("Mustang") is filing an application with the Colorado Oil and Gas Conservation Commission ("COGCC") to convert the above referenced well to a dedicated Class II underground injection well. In accordance with COGCC Rule 325 subparagraph i, this letter has been sent as notice of Mustang's application.

Mustang is filing this application as part of its efforts to reduce water hauling for its oil and gas operations in the area. The well was completed in 1993 in the Lewis formation at a depth of 5230' – 5251'. The injection well will remain completed in the Lewis formation as the objective water disposal interval.

Any person who would be directly and adversely affected or aggrieved by the authorization of the underground disposal into the proposed injection zone may file, within fifteen (15) days of notification, a written request for a public hearing before the COGCC, provided such request meets protest requirements specified in COGCC Rule 325 subparagraph m. Additional information on the operation of the proposed disposal well may also be obtained at the COGCC offices: 1120 Lincoln Street, Suite 801; Denver, CO 80203; 303-894-2100.

If you have any questions concerning this application, please contact the undersigned at 720-550-7507.

Sincerely,  
**Mustang Resources LLC**

Ben Woodruff, CPL  
Land Manager
