COMMENTS:

Caerus would like to use the remaining remediated soil associated with the release identified by COGCC Spill/Release Point ID 437688 to improve stormwater drainage on North Parachute Creek Road. This release has been officially closed via COGCC-approved Forms 4 and 19 (both attached to this document). Analytical results from samples collected from the removed soil indicate that the soil is in compliance with COGCC Table 910-1 Concentration Levels for all analytes or were within background concentrations except for the electrical conductivity measurement. However, pending COGCC approval, this soil will be used as beneficial reuse to improve stormwater drainage on north Parachute Creek Road and will not be re-vegetated for many years. Specifically, the remediated soil will be used to raise the elevation of the road surface along areas of the road where stormwater runoff accumulates instead of draining. This will allow runoff to be conveyed to existing stormwater best management practices such as sediment traps and culverts. All remediated soil applied to the road surface will be covered with road base. Background samples were collected from an undisturbed area near the pad.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public
