## Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Storm Water/Erosion Control	Stormwater management plan (SWMP) will be in place to address construction, drilling, and operations associated with oil and gas development throughout the state of Colorado. BMPs will be constructed and used as necessary to prevent stormwater from leaving the construction site. BMPs used will vary according to location, and will remain until the pad is reclaimed.
2	Material Handling and Spill Prevention	Spill Prevention Control and Countermeasure (SPCC) Plan will be in place to address any possible spill associated with oil and gas operations throughout the state of Colorado. -Materials and fluids will be stored in a neat and orderly fashion. -Waste will be collected regularly and disposed of at an onsite facility. -Prompt cleanup is required of spills to minimize waste materials entering the stormwater runoff. -Drip pans will be used during fueling and maintenance to contain spills or leaks. -Cleanup of trash and discarded material will be done at the end of the work day. -Cleanup will consist of monitoring the road, location, and any other work areas. -Material to be cleaned up includes trash, scrap, and contaminated soil.
3	Traffic control	Access roads will be constructed to accomodate local emergency vehicles. This road will be maintained for access at all times.
4	General Housekeeping	All surface facilities not subject to safety requirements shall be painted to blend with the natural color of the landscape.
5	Wildlife	All production equipment with a chimney, vent or stack shall be fitted with a device that will prevent birds from entering, such as a excluder cone, metal cage, or equivalent.
