

Facility # 116563

**Jacks Draw 4**

Jacks Draw 4 was plugged and abandoned on June 26th, 1995 (please see the attached sundry).

Wexpro Company submitted a sundry stating that re-contouring and seeding of the well location had occurred before September 1996 (see the attached sundry). This concludes that pit had to have been backfilled previous to the re-contouring and seeding of the well location. BLM (surface owner) approved the sundry, which would not have occurred had there been a pit present on location.

All of the above mentioned work was completed before December 30, 1997.

Wexpro requests closure and NFA for facility #116563.

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to the work.)

Jacks Draw No. 4 was plugged and abandoned on June 26, 1995 as follows:

1. Set cement retainer at about 2140'. Squeezed perfs (2198' - 2214') with 50 sacks Class "G" cement. Squeezed 3-3/4 bbls. below retainer and left about 130' of cement on top of retainer.
2. Mixed and placed 9.0 ppg Gel/Pozmix spacer from 2004' - 250'.
3. Perforated 5-1/2" casing at 305'. Pumped 50 sacks Class "G" cement down 5-1/2" casing (squeezing surface casing shoe thru holes at 305' and filling 5-1/2" from surface to 305') with no returns on 5-1/2" x 8-5/8".
4. Removed tubing head and casing spool. Top filled 5-1/2" and 8-5/8" casings with 35 sacks Class "G" cement.
5. Installed DHM with no cap (to be added at later date).

Reclamation work will proceed after an on-site to be scheduled.
