COMMENTS:

Whiting Oil and Gas Corporation (Whiting) is requesting approval to backfill the pit excavated at the Federal 8-6, utilizing the stockpiled soil for the backfill material. The analytical data, as summarized in the attached Tables, indicate that the proposed backfill materials meet the applicable Table 910-1 limits, with appropriate consideration given to the background soil analytical data from this field. The analytical data also indicate that the excavation sidewalls and bottom also meet the applicable Table 910-1 limits. Laboratory analyses were conducted by the ALS Laboratories in Kelso, Washington and Holland, Michigan, based on laboratory availability.

Whiting will plan to submit a final report to the COGCC following site backfill activities, and seek to close out the remediation project at that time.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Agency	Stockpiled soil as represented by laboratory analyses indicating Table 910-1 compliance is approved for beneficial re-use as on site pit backfill. Materials with pH, SAR, or EC concentrations exceeding Table 910-1 levels may be buried under a minimum of three (3) feet of backfill cover and soil that satisfies either the Table 910 -1 levels for pH, SAR, and EC or the background levels for such contaminants within three (3) feet of the ground surface at the site. In addition, soil horizons must be replaced in their original relative position and reclaimed in accordance with 1000 Series Rules, including the establishment of vegetative cover on non-cropland and successful crop growth on cropland.	6/7/2016 12:14:00 PM
Routing Review	A task has been opened for the Regional EPS to review the operator's request.	6/7/2016 9:07:21 AM
