## SUNDRY NOTICE

Submit a signed original. This form is to be used for general, technical and environmental sundry information. For proposed or completed operations, describe in full in Comments or provide as an attachment. Identify Well by API Number; identify Oil and Gas Location by Location ID Number; identify other Facility by Facility ID Number.

OGCC Operator Number: 100264 Contact Name Jessica Dooling

#### COMMENTS:

XTO Energy proposes use of ~125 cubic yards of cuttings material with elevated pH and Arsenic associated with the PCU T78X-12G Pit closure (REM 7466, DOC# 2231417) for beneficial reuse. The material will be used as backfill for the ongoing interim reclamation; it will be covered with 3 feet of clean fill meeting Table 910-1 standards. The proposed beneficial reuse material was sampled for COGCC Table 910-1 compliance and is below standards with the exception of pH (10.43) and Arsenic (7.6 mg/kg). Arsenic levels in the material are above the PCU T78X-12G COGCC approved (REM 7466, DOC# 2231417) background Arsenic level of 6.9 mg/kg. As approved in REM 7466 Arsenic in the proposed beneficial reuse cuttings (7.6 mg/kg) are presumed to be the result of material from the Mancos formation. See Table 1 attached.
