## General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Permit	BMPs and COAs for nuisance conditions including noise, odors, dust and lighting are on the Form 2A for this location, 2A# 400778235. Logging BMP attached to previously approved form 2 Doc 400620250. Final review complete.	7/27/2016 12:34:01 PM
Permit	Conductor pipe was set 12/4/14. See document 400752730 approved 12/17/16. Corrected Unit description from S.8:N/2 to Sec 8:N/2 and notified operator.	7/22/2016 2:21:29 PM
Engineer	The Wasatch Formation is present at surface, possibly overlain by landslide deposits, based on review of COGCC's geologic maps. The operator's proposed surface casing setting depth or First String cement coverage will provide adequate isolation across Wasatch G productive intervals (offset Wasatch G production within one mile to the northeast in Section 4). The operator's proposed surface casing setting depth is above the Fort Union Formation top. Based on COGCC offset log review, Fort Union cement coverage is not required for wells on this pad. Drilling operations on this pad are on-going, and this is a re-file permit. Lower Wasatch cement coverage is not required, consistent with other approved permits on this pad. Condition of Approval #3 addresses isolation of the Mesaverde Group. Operator agreed with revised cement volumes and a proposed cement top for the First String via email on 7/20/2016 to provide the required coverage (updated by COGCC in the casing/cement section of this form on 7/22/2016; sacks based on operator's proposed 1.83 cf/sk yield).	7/22/2016 10:05:22 AM
Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 240 feet.  Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required.  Changed distance to wellbore owned by another operator to 100' per operator. Distance is in plan view only. Actual three dimensional separation is much greater. No anti-collision scan or stimulation consent required.	7/15/2016 9:54:27 AM
Permit	Passed completeness.	6/24/2016 12:17:45 PM
Permit	Note - attachments and BMPs found in well file.	6/24/2016 12:17:30 PM
