**COGCC Comments**

Comment	User	Date
<p>This location fails to comply with the following Rule 1003 regulation:</p> <p>1) Interim reclamation areas have not been reclaimed that reflects cropland reference areas with total percent plant cover and total plant height of at least 80% of reference areas. Crop growth is stunted and crop density is diminished or not growing which is not reflective of reference areas. Crop height in interim areas averaged 24" versus 84" in reference areas.</p> <p>Refer to attached photos in Document #682401097.</p> <p>Collaborate with the landowner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities, or crop production. Provide a reclamation plan attached to a Form 4 by CA date of 9/1/16, assigned to Chris Binschus. The reclamation plan should include a minimum of a detailed schedule for reclamation activities, weed management plan, stormwater management plan during and after reclamation activities, fertilizer/soil amendments (if needed), approved landowner seed mixture, seed application method, and mulch type. After approval of the reclamation plan, a new corrective action date to perform interim reclamation work will be set through the Form 4 process.</p>	binschusc	08/04/2016
