COMMENTS:

See attached economic evaluation for running a pipeline to gather the gas from the Simoes 12-30 and two additional wells in the vicinity, and one of which is produced intermittently.

Gathering Line Connection Point: Jetta Operating Co. Craig 1-7 in NE-NW 7-6N-90W. Estimated minimum pipeline length is 18,484'. This evaluation is based upon the following:

Capital Costs: \$1,109,040
Gas Price Used \$3.00/MMBtu
Severance Tax = 0%
Operating Costs = \$0

The project will not payout during the forecasted life of the wells with the discounted loss on investment being over \$1,000,000 not accounting for severance taxes or operation costs (compression, pigging, chemicals, etc).

The forecasted gas production used in the economic evaluation is gas to flare.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

Operator Comments:

The project will not payout during the forecasted life of the well. Request to flare gas produced. Many of SWN's operated wells are in remote areas. The economics of this well do not support construction of an infrastructure. SWN has continued interest in developing this area and plans to do so when pricing rebounds. SWN operations are in compliance with Rule 805.b.(1). SWN will continue to use CDPHE approved flaring method and any site specific permitting required by the CDPHE. SWN will evaluate power generation, gas to liquids technology, or other options for produced gas for the next annual Sundry filing.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: BURGER, CRAIG Date: 8/24/2016

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

- 1) Comply with all requirements of Rule 912, including monthly reporting of flared volumes (on Form 7) and notifications to local emergency dispatch or the local government designee.
- 2) Submit annual updates (requests to flare) to COGCC on Form 4s (Sundry Notices), including all information specified in COGCC's "Notice to Operators, Rule 912 Venting or Flaring Produced Natural Gas - Statewide."
- 3) Comply with any Colorado Department of Public Health and Environment, Air Pollution Control Division rules or requirements for all atmospheric discharges.
- 4) An enclosed flare shall be used, unless an open flare is specifically allowed by CDPHE's Regulation 7.
- 5) Within 30 days of commencement of flaring: collect a new gas sample for laboratory analysis of hydrogen sulfide and submit a new Form 4 with the laboratory results. Analysis attachments to the new Form 4 shall be a PDF copy of the laboratory data sheet and an Electronic Data Deliverable (EDD) prepared by the laboratory in the format specified on COGCC's website, located in Help => Environmental => COGCC EDD Information.
