Hi Jess,

COGCC has reviewed the closure report for the Peterson 1-12 Tank Battery (Spill ID 445470). Since ground water impact was discovered and treated, four quarters of monitoring that demonstrates compliance with Table 910-1 Concentration Levels for BTEX is required. Synergy needs to submit a Form 27 in accordance with Rules 905.b. and 909.c. with a proposal for continued ground water monitoring at MW-15 and select additional monitoring wells for an additional three quarters.

The Form 27 can be emailed directly to me for review. Upon approval of the Form 27, Spill 445470 will be resolved.

Thank you,
Rick
