Mike,

Thanks for the submittal and I will get it processed. Questions I have are:

- What repairs were made to MW-3 as it was damaged and could not be sampled in June 2016?
- Could the 2-butanone detection be from repairing MW-3? Any glues or solvents used?
- Could the acetone detection and the 2-butanone be a laboratory contaminant?

Thanks
Alex

Alex,

Please see the attached Form 27 regarding the monitoring results at the Centralized E&P Waste Management Facility noted below. We will continue monitoring activities. Please let me know if you have any questions or comments.

Thanks,

Subject: Re: Release notification

Mike,

Per our telephone conversation, please proceed with identifying the source(s) of the DRO and GRO detections proceeding with a Form 27. As this is a Centralized E&P Facility, I will be the COGCC contact.

Thanks

Alex

Alex,

Per our phone conversation, this email serves as notification of a GRO detection in one monitoring well and DRO detections in two monitoring wells at the Centralized E&P Waste Management Facility noted below. Anadarko is the owner of the property. We will prepare a Form 19.

DFMF 2 (Strear Farms)

SW 23-2N-67W

Facility ID 437129

At this time, oily waste has not been brought into the facility; however, there are other oil & gas operations on the property associated with both Anadarko/Kerr-McGee and another operator. Additionally the facility was previously a turkey farm and an abandoned pipeline crosses the parcel. Please let me know if you have any questions.

Thanks,

Mike Dinkel, REM, CSEM
