COGCC Comments

Comment	User	Date
<p>Location fails to comply with Rule 1004 for the following reasons:</p> <p>1) Location needs to be re-contoured and reduced in size. Gravel needs to be removed from portions of the location that will be reduced in size. After location has been re-contoured and reduced in size, location needs to be seeded with native, perennial vegetation that is representative of reference areas. Location needs to be stabilized during the reclamation phase until native, perennial vegetation has stabilized the location.</p> <p>2) Diffuse knapweed (<i>Centarea diffusa</i>), a List B Colorado noxious weed, was observed at low densities at location (< 30 plants) and needs to be removed.</p> <p>Refer to attached photos in Document #682401255.</p>	binschusc	09/12/2016
