Mike, thanks for the update. I will check with Mr. Hagler after you tell me that you have completed corrective actions. He did file a formal complaint regarding this matter with the COGCC last week (200439757) if you want to see that.

Peter/Alex,

I wanted to let you know that we were able to meet with this landowner and come to an agreement on this cleanup. The cleanup began this week and should be finished shortly. I will follow up with an email when everything has been completed to the landowner's satisfactions.

Thanks and let me know if you have any questions.

Peter, we have a crew ready to perform the cleanup. We also have our land group attempting to contact the landowner to get permission. Once the approval has been acquired, we will initiate cleanup. It also appears that stormwater from our centralized E&P Waste Management facility in neighboring SW 34 3N 66W also overflowed the berm and is contributing to the heavy flow. The berms at this facility are intact. This facility is referred to as our Drilling Fluid Management Facility (DFMF) #1. I will follow up once cleanup is completed.

Thanks, Mike
