

Remedial Correction Plan for Wells ¼ - Mile – EWS 3A

All wells within the ½ mile Area of Review (AOR) were reviewed for the entire length of the wellbore. Excluding the EWS 3 well (API# 05-123-37120,) no wells within the AOR penetrated the top of the Lyons formation, or came within 500 feet of doing so. The EWS 3 well is well cemented, and is offset one mile from the planned top of the injection zone in the EWS 3A well. As such, no remedial correction of any type is anticipated to be necessary to ensure adequate confinement for the EWS 3A well.
