Environmental Inspection conducted after notification from Encana that an unidentified person left a tank valve open. Encana responded to the incident closing the valve and recovering all available produced water. At the time of the inspection, no signs of spill were observed other than wet gravel within the secondary containment. No standing water was observed within the secondary containment. Areas around the tank battery was dry. No odor or staining was observed.

Pieces of liner and netting were observed on the SW section of the pad, mixed in with the soil. Other than that no junk, staining or weeds were observed on site.
