COMMENTS:

Gulfport Energy Corporation respectfully requests continued flaring for the State 33-15 due to the lack of gathering lines, increased development or new pipeline that would allow the capture and sale of gas. The conditions remain such that it would be uneconomic to construct such facilities.

The estimated volume of gas flared for 2015 was 5.23 MMscf.

Gulfport Energy is in compliance with Rule 805.b.(1).

Gulfport Energy will use a CDPHE approved flaring method and any site-specific permitting required by the CDPHE.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
