Comment Overall, interim reclamation is satisfactory.
There was noxious weeds (Canada thistle) found along the north side of the location. The weeds had developed and dispersed seed. See Attached Photos

Corrective Action Perform weed control practices as soon as possible and/or by the beginning of the next growing season (spring). Any remaining seed heads should be removed and disposed of as soon as possible.

COGCC Comments		
Comment	User	Date
Noxious weeds: Canada thistle is designated to be a list B noxious weed, which should be controlled to stop the spread of these species off of the oil and gas location. Weed control efforts should be performed prior to the weeds developing and dispersing seed. Ongoing weed control efforts should be performed to adequately control noxious weed growth.
