

## Remedial Correction Plan for Wells ¼ - Mile – EWS 4 and 4A

All wells within the ½ mile Area of Review (AOR) were reviewed for the entire length of the wellbore. No wells within the AOR penetrated the top of the Lyons formation, or came within 500 feet of doing so. As such, no remedial correction of any type is anticipated to be necessary to ensure adequate confinement for the EWS 4 and 4A wells.
