General Comment:

This is an Interim Reclamation and Stormwater focused Inspection; a follow up to Inspection Doc#680100091. Any Corrective Actions from previous Inspections that have not been addressed are still applicable. Corrective Actions from Insp Doc#680100091 have been resolved. Refer to Photos attached and Interim Reclamation Section for Recommendations to assure success of newly installed Reclamation vegetation.

Comment

Areas no Longer in use have been reclaimed. Site is well contoured and had good germination. Earlier in Season Vegetation was vigorous & on its way to good root development and a complete growth cycle, to maturing and producing seed head in its First year. Since Turn out in June Cattle have been grazing the Location constantly attracted to the New Grasses. Photos attached show how the Season long grazing affected Plant growth. Vegetation is going into Winter without time for root, seed development, or buildup of carbohydrate reserves. It is Recommend to Fence Livestock OUT of new, establishing vegetation.
