Comment: [The vegetation has not established and there are noxious weeds \(Diffuse knapweed\) growing along the access road and at the location. There are piles of straw debris at the west side of the location and plastic debris along the southeast side. See Attached Photos](#)

Corrective Action: \_\_\_\_\_ Date **11/30/2016**

Remove and control noxious weed growth. Remove plastic debris and piles of straw debris. Reseed and stabilize areas of the location to facilitate vegetation establishment.

Overall Final Reclamation

Fail

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: There are signs of erosion occurring along the access road. There is also signs of erosion at the southeast and south side of the location. See Attached Photos

Corrective Action: Install or repair required BMPs per Rule 1002.f. Refer to the 1002.f guidance document for further details.

Date: \_\_\_\_\_

Pits: ☒ NO SURFACE INDICATION OF PIT

**COGCC Comments**

Comment	User	Date
The noxious weeds (Diffuse knapweed) have developed seed. These plants will need to be collected and removed to prevent further seed dispersal. Other control methods will need to be utilized and continued efforts must be performed to adequately control the noxious weed infestation.	CostaR	12/05/2016
Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Continue to monitor and manage this site until the final reclamation requirements are achieved.	CostaR	12/05/2016
Submit Form 4 when corrective actions are completed. Include photographs or other documentation showing completion of corrective actions required in this inspection.	CostaR	12/05/2016
