Rifle, CO. 81650

**RE: Terra Energy Partners LLC  
Accordance to COGCC Rule 317b Section e (3)  
Notification of disturbance within 15 miles of public water systems.  
Location # SR 23-12**

Mr. Barth,

Terra Energy is required by the current COGCC regulations (2009) to provide notification to public water supply systems within 15 miles downstream of DCPS (Drilling, Completions, Production and Storage) operations. According to the location of the 317b areas specified by the COGCC, your water intake is located within a 15 stream/river miles distance downstream of activities required to be reported under these COGCC regulations.

This is official notification that surface disturbance will occur within a COGCC designated 317b area upstream from the city's public water intake system. Current contact information has been acquired for the personnel in charge of the public water intake and they will be notified in the case of a potential impact to the water intake system.

If you have any questions or need any additional information, please do not hesitate to contact me at 970 433-8792.

Sincerely,

A handwritten signature in black ink that reads "Heather Foor". The signature is written in a cursive, flowing style.

Heather Foor  
Environmental Specialist
