#### COMMENTS:

SandRidge plans to use this API to drill a vertical pilot hole (see attachments and casing design).  
The minerals beneath this oil & gas location will not be developed by the "-00" portion of the wellbore.

<b><u>No</u></b>		<b><u>BMP/COA Type</u></b>	<b><u>Description</u></b>
1		Drilling/Completion Operations	The pilot hole on this pad will be logged with an open-hole resistivity log and gamma ray log from TD into the surface casing. All wells on the pad will have a cement bond log with gamma ray on production casing or on intermediate casing if production liner is ran. The form 5, Completion report, for this well will list all logs run and will have logs attached.

**Operator Comments:**

This well is being drilled as a pilot hole to run extra logs, retrieve core samples, and adequately map the stratigraphy of the region. Upon completion of the pilot hole analysis the well will be plugged back and a lateral will be drilled. This pilot hole will help gather information for Sandridge to aid in our prudent development of this field.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Permit	The operator did not originally plan to drill a pilot hole on this location however the current plan is to drill a pilot, plug back upon analysis completion, and then drill a lateral within the desired formation. The Form 2#401101518 was sundried with the Form 4#401169994 to correct the "-00" wellbore from a horizontal well to a pilot hole. The subsequent Form 2#401132367 will receive the "-01" designation and the drilling plans for the horizontal wellbore.	12/21/2016
