Shauna,

COGCC is in the process of reviewing the Form 2A for the Edge Energy Cherry Knolls West location (doc no 401145964). In order to complete our review, please address the following:

1. The comments section and BMP section mention an MLVT, but an MLVT is not listed under the facilities on the Form 2A and it's not shown on the Location Drawing. Can you please confirm if there will be an MLVT at this location and resolve the discrepancy?

2. Under the cultural section, the nearest piece of production equipment is listed at 5 feet from the property line. Can you please inform us if that is tanks or other equipment?

3. The distance to the nearest water well appears to be from the reference point and not from the edge of disturbance. Please provide a distance to the nearest water well from the edge of disturbance. Are there any mitigation measures for protection of the nearby surface water body?

Please let me know if you have any questions or would like to discuss further regarding the above.

Thank you,
Rebecca Treitz

Subject: Edge Energy Cherry Knolls West Form 2A doc no 401145964

Shauna,

COGCC is in the process of reviewing the Form 2A for the Edge Energy Cherry Knolls West location (doc no 401145964). In order to complete our review, please address the following:

1. The comments section and BMP section mention an MLVT, but an MLVT is not listed under the facilities on the Form 2A and it's not shown on the Location Drawing. Can you please confirm if there will be an MLVT at this location and resolve the discrepancy?

[There will be 1 MLVT on location. There will no be a buried water vault. Attached is the scaled facility to show the MLVT.](#)

2. Under the cultural section, the nearest piece of production equipment is listed at 5 feet from the property line. Can you please inform us if that is tanks or other equipment? [The separators are the closest equipment to the property line at 25'. The distance of 5 feet is from the edge or disturbance.](#)

3. The distance to the nearest water well appears to be from the reference point and not from the edge of disturbance. Please provide a distance to the nearest water well from the edge of disturbance. Are there any mitigation measures for protection of the nearby surface water body? [Nearest water well is 1090' from the edge of disturbance.](#)

[Edge will have Berms constructed to protect the near by water source.](#)

[Berm Construction. Tank berms shall be constructed of steel rings with a synthetic or engineered liner and designed to contain 150% of the capacity of the largest tank. All berms will be visually checked periodically to ensure proper working condition. Secondary containment devices shall be sufficiently impervious to contain any spilled or released material. Tertiary containment, such as an earthen berm, will be installed around production facilities.](#)

Please let me know if you have any questions or would like to discuss further regarding the above.

Thank you,
Rebecca Treitz
