Complaint

Comment: [Complaint #200440829](#)
 Landowner's complaint stated that water was coming up from an old well and soaking into his crop field for a few years and currently. Area of surface ponding corresponds to this well's location/API number. The well was in the COGCC database and was DA'd in 1972. Inspection requested and Inspector observed bubbles coming up from a circular water area in the field that was marked by a cone as the landowner stated (see attached photos) indicating possible wellbore integrity issues that will require further review by COGCC Engineering. Water samples were collected by COGCC Environmental Specialist on 12/30/2016.
