Peter,

I just stopped by the well since it's so close to my office. It looks like the stuffing box clogged during the day, since it wasn't like this during the pumper's visit this morning. Based on production, it should be under 1 bbl, so no need for a Form 19. I am on location with a vac truck so we can start removing contaminated soil. I personally shut the well in.

Please let me know if you need any additional information.

Thanks,

Susi

Subject: 123-09491 Elkhorn Company B-9 release

Susi and Max,

A few minutes ago, Conor Pesicka (one of our inspectors) called me and I just want to make contact with you even though he already left you a message after calling in on your emergency contact #.

He observed a release of hydrocarbons and I think he stated about 10 feet x 10 feet area. Conor stated he will enter an inspection most likely tonight).

Please let me know that you received his call and this email and that you are taking appropriate cleanup actions including reporting if you determine volume of hydrocarbons released requires form 19.

Peter
