Waste Branch

Mr. Jeffrey R. Swanson  
Hazardous Materials and Waste  
Management Division  
Colorado Department of Public  
Health and Environment  
4300 Cherry Creek Drive South  
Denver, Colorado 80246-1530

Dear Mr. Swanson:

Enclosed are two copies of the Technical Memorandum Subsurface Anomaly (Draft). This technical memorandum documented the findings from the site visit conducted on August 31, 1999, at the Former Lowry Bombing and Gunnery Range (Section 34, Township 4 South, Range 64 West), Arapahoe County, Colorado. The U.S. Army Corps of Engineers, Omaha District, prepared this technical memorandum as part of the Defense Environmental Restoration Program (DERP) for Formerly Used Defense Sites on behalf of the Department of Defense. The objective of the site visit was to investigate this anomaly and determine if this area should be considered for future investigation, as well as its eligibility for funding allocation under the purview of the DERP.

The Omaha District would like your office to review the enclosed document and forward any review comments to the attention of Mr. Hector Santiago, Project Manager for this project. Review comments can be sent by e-mail ([hector.l.santiago@usace.army.mil](mailto:hector.l.santiago@usace.army.mil)) or fax (402) 221-7699.

If you have any questions or concerns, please contact Mr. Santiago at telephone number (402) 221-7644.

Sincerely,

A handwritten signature in black ink, appearing to read "Douglas A. Plack". The signature is fluid and cursive, with the first name "Douglas" being more prominent and the last name "Plack" following in a similar style.
