### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	Unknown if there are impacts.	If identified-excavation

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Per COGCC Rule 905.b, soil and groundwater (if present) samples will be collected when a buried or partially buried produced water vessel is removed from service to confirm COGCC compliance. The initial investigation will be conducted using excavation equipment.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

If no suspected release is identified, one discrete grab soil sample will be collected directly beneath the water vessel upon removal for laboratory analysis. If a release is discovered (and confirmed through soil screening and/or laboratory analysis) and/or groundwater is encountered during the removal activities additional excavations may be conducted to further delineate horizontally and vertically. If the extent of impacts are reached and/or remaining impact analytical results are needed for future remediation activities discrete soil samples will be collected from the sidewalls and base (if groundwater is not present) and analyzed for COGCC compliance

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during excavation activities one sample will be collected and analyzed for BTEX.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If a release is discovered (and confirmed through soil screening and/or laboratory analysis) below the partially buried water vessel, soils may be removed and transported to a licensed disposal facility. If all source material cannot be removed during excavation activities additional methodologies will be proposed in subsequent proposals.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

As needed, site specific soil and/or groundwater remediation plans will be developed and submitted to COGCC via supplemental Form 27s.
