**General Comment:**

This is an inspection conducted via desktop for a historical location that was plugged and abandoned in 1951 (Document 976736). There are no electronic inspections on record for this location. Document 976739 shows that the bond was released on September 16, 1952. An aerial inspection of this location does not show any obvious disturbance related to oil and gas operations. There are no known complaints or outstanding issues related to this location on record. This inspection formally passes final reclamation for documentation purposes. COGCC no longer has a contact on record for this operator. No surety records are found for this company.
