OGCC inspector was on location on 3/3/17 to investigate complaint. Wind speeds were too high to run a valid noise survey. Agricultural burning in the area was commencing and the odor of burning cropland covered up any other odors at the time of inspection. OGCC inspector did observe that all location light towers were pointed inward and downward to location. OGCC inspector will return on 3/6/17 to try and run a sound survey and see if any detectable odors are present.
