Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

DCP Environmental was informed by DCP Pipeline group of a pipeline valve release near a DCP Operated meter run on March 3rd, 2017 around 9:00 am. At the time of discovery a small amount of liquid was present at the soil surface. The DCP Environmental group reviewed the pipeline release along with DCP Pipeline to investigate the release. During the investigation the size of the release was estimated at less than 1 barrel of condensate. DCP Pipeline group repaired the valve on March 3rd, 2017. DCP Environmental collected two soil samples from the impacted area and submitted them for analysis. Cleanup of the released condensate is scheduled, soil samples will be collected and any further remediation will be conducted as needed.

List Agencies and Other Parties Notified:

**OPERATOR COMMENTS:**

eForm is being submitted as a precaution that during remediation of the location it is determined that greater than 1 bbl of condensate had been spilled.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
