CORRECTIVE ACTIONS:

1 ☒ CA# 54494

Corrective Action:

Date: 05/01/2017

Location ID 331020 with the following API#123-20039 has the following status:

1) Well location: PASS.

2) Tank battery location: IN-PROCESS. A seeding attempt is evident but location lacks uniform vegetative growth that is not reflective of reference areas. May need additional reclamation work to bring location into compliance with Rule 1004 standards.

3) Access Road: FAIL. Access road has not been properly reclaimed per Rule 1004. Appears that approximately 400' of the access road has not been reclaimed. Based off field observations and aerial imagery, the access road was built for access to the well location. Perform final reclamation activities by corrective action date of 5/1/2017.

Response: CA COMPLETED

Date of Completion: 01/18/2017

Operator Comment: Land owner variance is in process. The land owner has requested that we leave the road in place.

COGCC Decision: Approved via an AMI

COGCC Representative: Corrective action still remains open until the Operator submits the variance request. Upon receiving the request, COGCC will review the contents of the request and coordinate with the Operator.
