# McIntyre E&P Waste Management Facility

Lower Pit (Looking West)

Upper Pit (Looking Norwest)

## McIntyre E&P Waste Management Facility

Upper Pit (looking Northwest). Netting in good general conditions. Color flags.

Upper Pit (looking East). Produced Water Discharge Manifold

## McIntyre E&P Waste Management Facility

Access/Emergency road around the upper pit (looking Northeast)

Upper Pit (looking Southeast)

## McIntyre E&P Waste Management Facility

Lower Pit. Looking south. Manifold at the center of the photo.

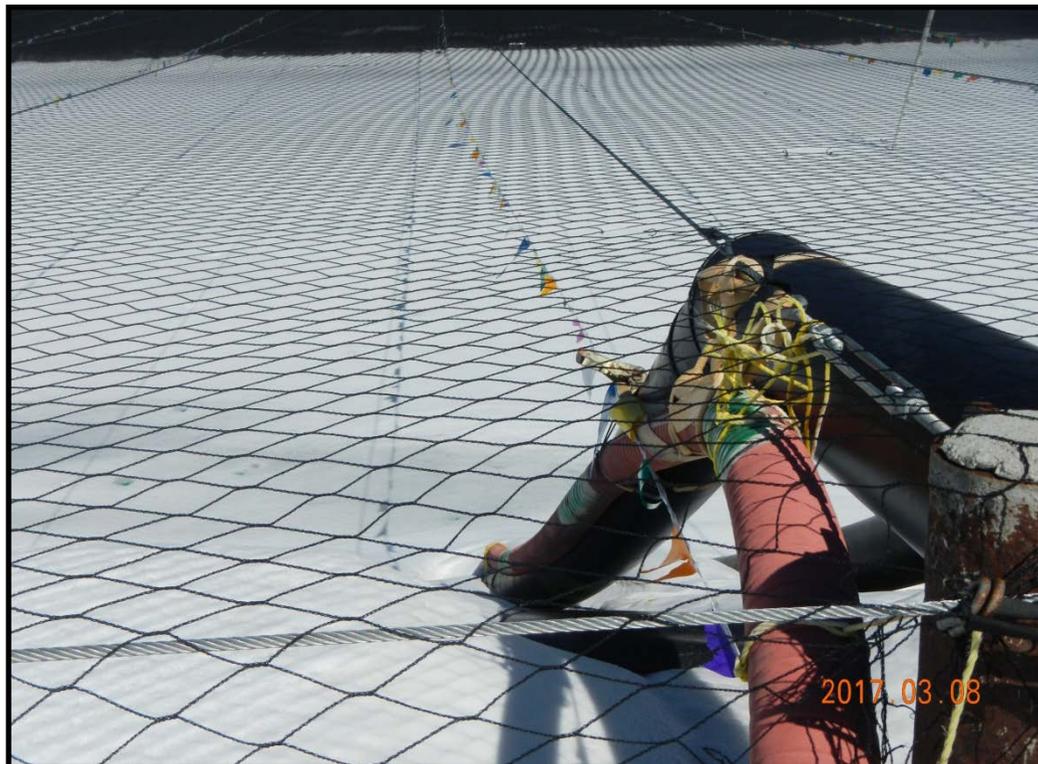

Lower Pit. Looking southeast. Access/service road continues around lower pit (and around upper pit as well).

## McIntyre E&P Waste Management Facility

Lower Pit. Permanently Installed Produced Water discharge Manifold

Lower Pit. Discharge piping  
Some observed damage to the netting

## McIntyre E&P Waste Management Facility

Lower Pit. Looking south. Access/service road and storm water management (drainage and retention pond on the down gradient side (far south on the photo)).

One of the three monitoring wells. All three on the south/down-gradient side of lower pit.  
Note: There is a MW up-gradient (north) of the upper pit.

All four are regularly gauged and sampled
