1. INTRODUCTION

Sg Interests I, Ltd. (SG Interests) received a Field Inspection (#67100520) form on 4/11/2017 for the McIntyre E&P Centralized Waste Management Facility from an inspection conducted on 3/8/2017. The overall condition of the facility was observed to be in good condition. Two corrective action items were listed as needing to be fixed with a follow-up response requested. The following sections describe and document the corrective action items addressed.

1.1 Missing Sign

SG Interests was given a corrective action deadline for 4/21/2017; however the missing sign was installed in early April, 2017. Photo 1 below is a photo of the sign installed.

Photo 1: Installed sign per COGCC Rule 210.c at the entrance to the McIntyre Facility.

2. DAMAGE TO NETTING

Damage was also observed to the lower pit netting, near the manifold. After receiving the inspection form yesterday (4/11/17), SG Interests field staff fixed the damage immediately. The photos below show before and after fixing damage found in the netting.
