Subject: State Reportable Notification

Good Morning,

Yesterday afternoon, we had a State reportable release due to quantity released inside of containment at the tank battery noted below. A produced water tank overflowed approximately seven (7) barrels of oil and produced water inside secondary containment due to an automation failure. A vacuum truck was deployed to recover the puddled fluids inside the containment. The remaining impacts will be excavated to COGCC Table 910 standards. More information will be provided in a forthcoming COGCC Initial Form 19 Release Report. Please let me know if you have any questions.

Facility: Shafer 21-25, Badding USX W25-06 Tank Battery
API: 05-123-22156
Facility Legals: NENW Sec. 25-T2N-R66W

Thanks

Paul Schwarz
